Unity Asset Store Publisher Page: <https://assetstore.unity.com/publishers/96895>

Overview

Production-ready sci-fi engineering tool designed for repair, maintenance, and environmental storytelling.

This free sample demonstrates material quality, LOD structure, and packaging standards used across Frontier assets.

Prefabs included

- Pipe Wrench (LOD0–LOD2)

Frontier Series

For a complete engineering tool set within the Frontier Series, see Frontier Engineer’s Toolbox:

<https://assetstore.unity.com/packages/3d/props/tools/frontier-engineer-s-toolbox-351206>

Quick Setup

1. Import into Unity 2022.3 LTS+ (URP or HDRP).
2. Ensure both folders are present:
 - ML/FrontierCore
 - ML/FrontierEngineersPipeWrench
3. Open the sample scene (optional).
4. Drag prefab into your scene.

Unused render pipeline folders may be deleted safely.

Materials & Customization

2k PBR workflow:

- Normal
- Mask Material (Material / Tint / Surface packed)
- Emissive

Material variants:

Engineer Yellow, Natural Grey, Medical Red, Research Green (Clean and Worn versions)

Parameters are adjustable in the Inspector.

Technical Specifications

Unity: 2022.3 LTS+

URP: Supported

HDRP: Supported

Built-in: Not supported

LODs: 3 levels

Colliders: Child box colliders

Textures: 2k

Scripts: None

Animations: None

Generic FBX included.

Known Limitations

- Built-in Render Pipeline is not supported.
 - No animations or interaction scripts are included.
 - This is a single-asset free sample and not a full tool pack.
-
